Hoop Skirts.

NEW SKIRT FOR 1866.

The Great Invention of the Age in HOOP SKIRTS.

J. W. Bradley's New Patent Duplex Elliptic (or Double) Spring Skirt.

The invention consists of Duplex (or two) Elliptic Pure Refined Steel Springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most inflexible, elastic, and durable Spring ever used. They seldom bend or break, like the single springs, and consequently preserve their perfect and beautiful shape more than twice as long as any single spring skirt that ever has or can be made.

The wonderful flexibility and great comfort and pleasure to any lady wearing the Duplex Elliptic Skirt will be experienced particularly in all crowded assemblies, operas, carriages, railroad cars, church pews, arm chairs, for promenade and house dress, as the skirt can be folded when in use to occupy a small place as easily and conveniently as a silk or muslin dress.

A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Skirt for a single day will never afterwards dispense with their use. For children, Misses, and young ladies they are superior to all others.

The hoops are covered with two ply double twisted thread and will wear twice as long as the single yarn covering which is used on all Single Steel Hoop Skirts. The three bottom rods on every Skirt are also double steel, and double covered to prevent the covering from wearing off the rods when dragging down stairs, stone steps, etc., etc., which they are superior to when in use.

All are made of the new and elegant corded tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most durable, comfortable and economical skirt ever made.
